

ANR Datazero

DATAcenter with Zero Emission and RObust management using renewable energy

October 1st, 2015 — December 31st 2019

March 2020 - December 2023

datazero.org

as green as possible

Jean-Marc.Pierson@irit.fr

An innovative datacenter model

- » Adapting the *IT load* to the Power available
and
- » Adapting the *Power* to the incoming IT load
while avoiding unnecessary operations and materials and using a mix of energy sources

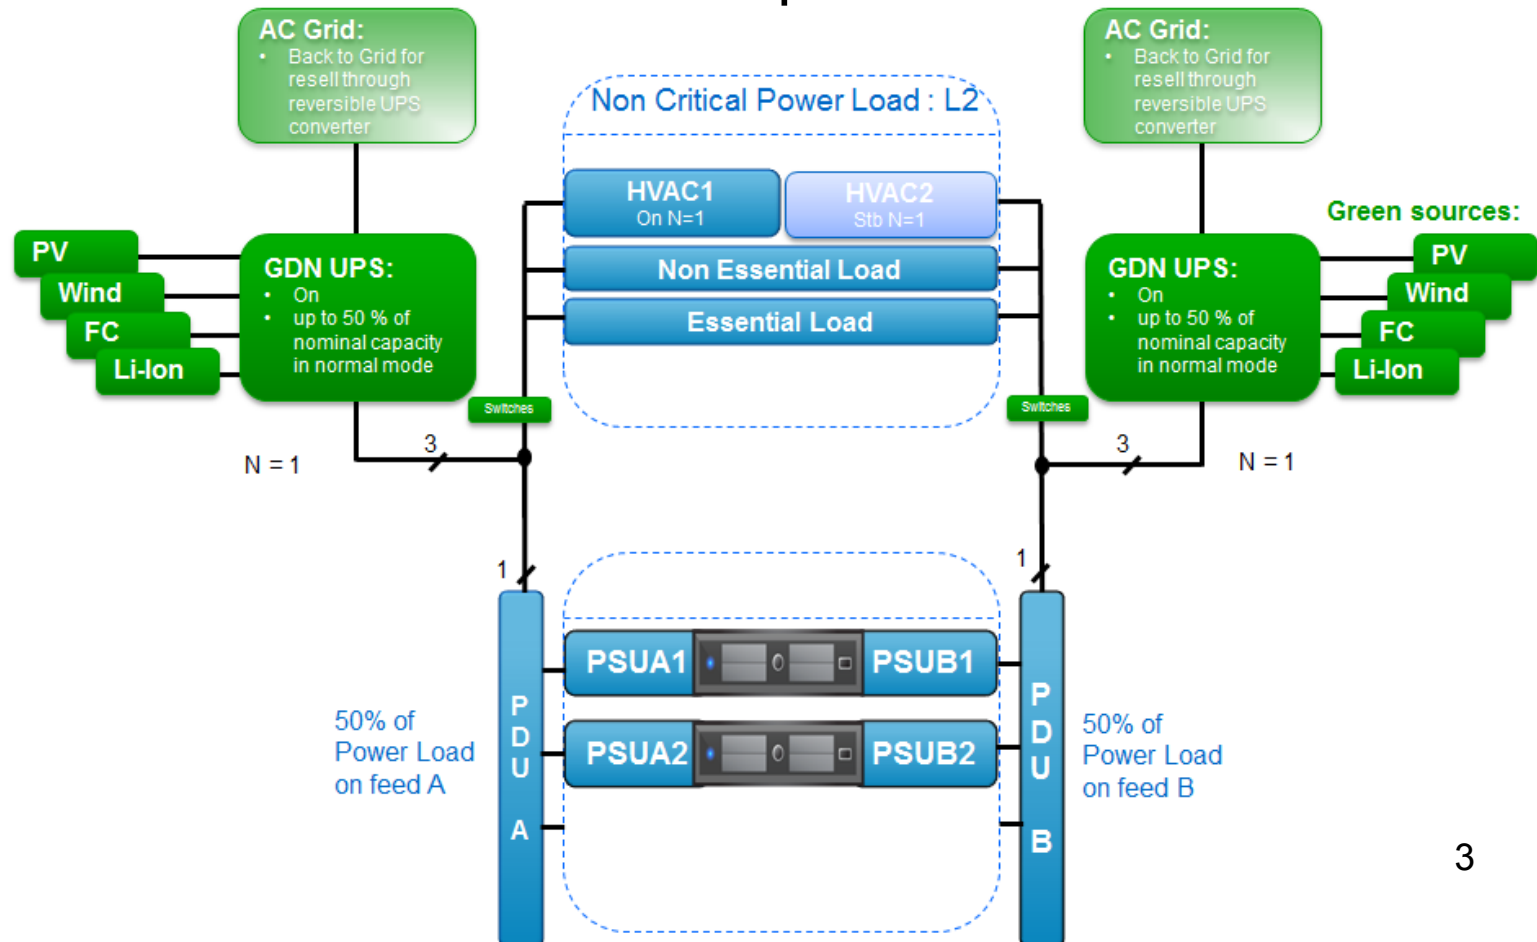

First, we need an electrical and IT connection...

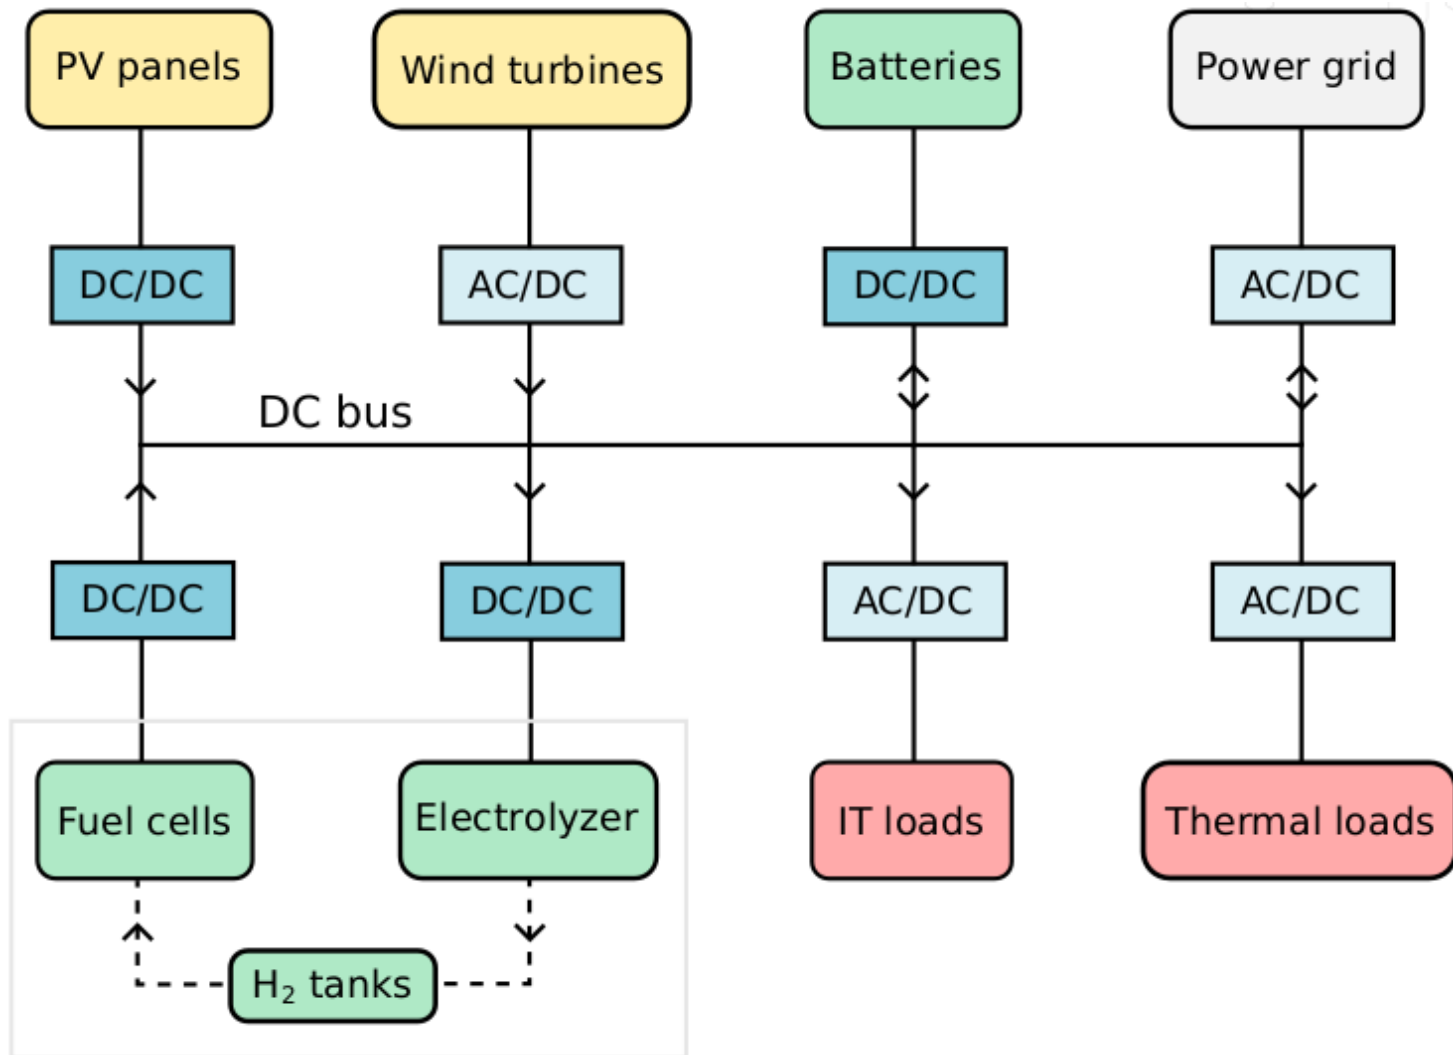

We proposed two infrastructures:

- “Classical” Electrical Schema: Up to $N+1$ (Green+Grid)
- Innovative Electrical Schema: Up to $2N$ Green

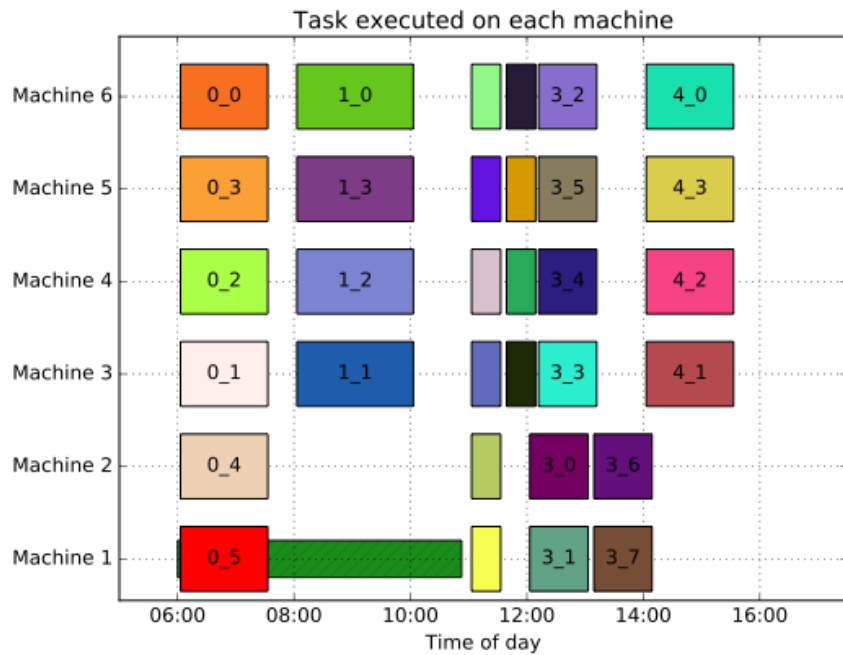

The components form a microgrid

A simplistic example

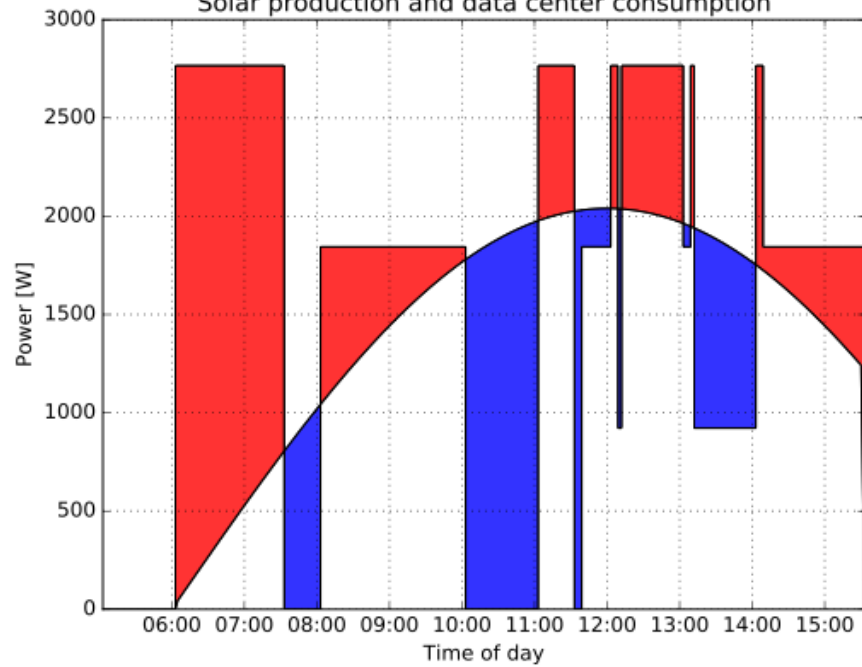

Task executed on each machine

Solar production and data center consumption

Task executed on each machine

Solar production and data center consumption

Task executed on each machine

Task executed on each machine

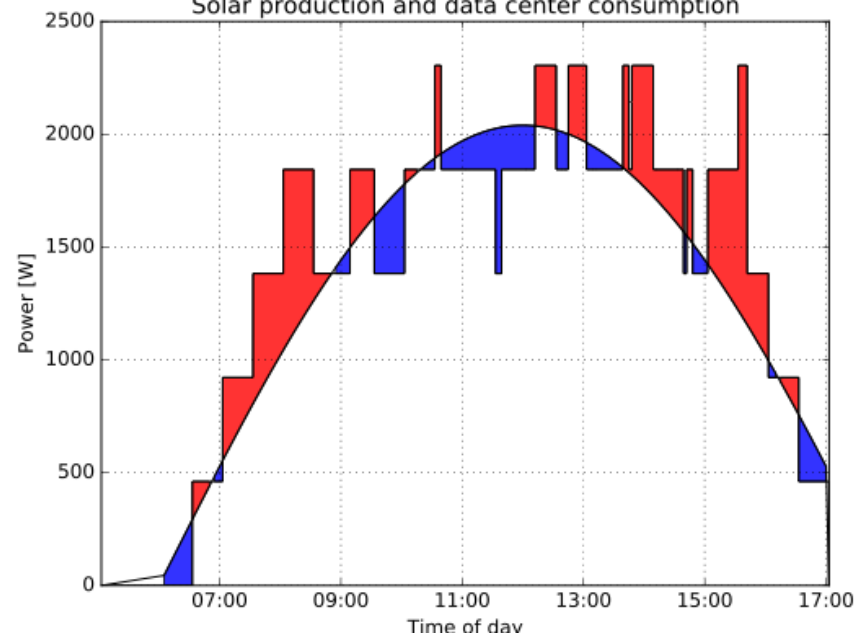

Solar production and data center consumption

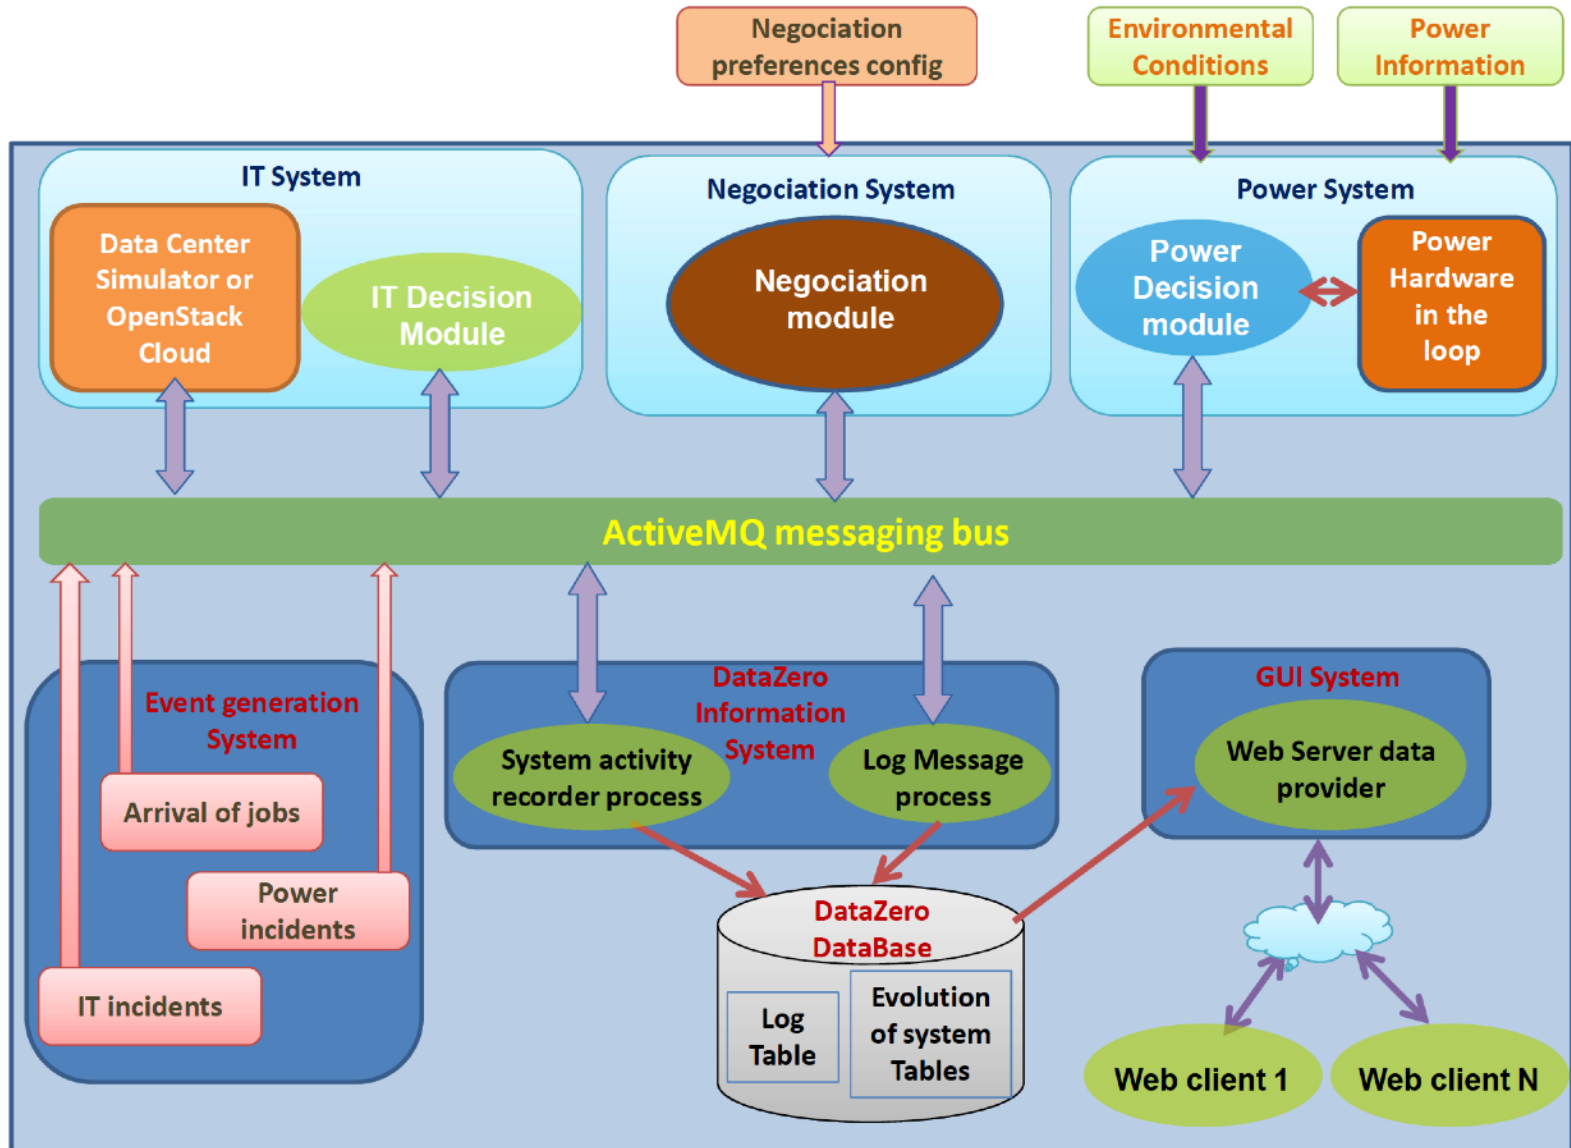

Task executed on each machine

Solar production and data center consumption

Middleware, Simulation, Real Hardware

Main results

- » Sizing of datacenter powered by renewable datacenter (mathematical model)
- » Simulation of the operation of datacenters with renewable energy
- » Experiments with Openstack Cloud, real PV and FC

Results

- » All papers are available on datazero.org
- » 15+ Research papers, and counting...
- » Jean-Marc Pierson, Gwilerm Baudic and Stéphane Caux, Berk Celik, Georges Da Costa, Léo Grange, Marwa Haddad, Jérôme Lecuivre, Jean-Marc Nicod, Laurent Philippe, Veronika Rehn-Sonigo, Robin Roche, Gustavo Rostirolla, Amal Sayah, Patricia Stolf, Thi Minh-Thuyen and Christophe Varnier, DATAZERO: **Datacenter With Zero Emission and Robust Management Using Renewable Energy**, in IEEE Access journal, Volume 7, pages 103209 - 103230, July 2019, <https://doi.org/10.1109/ACCESS.2019.2930368>

Next Steps : DATAZERO 2

- Same consortium, until end 2023/2024
- More importance on robustness of the task scheduling and power source commitment against uncertainty and failure.
- Dynamic reconfiguration of electrical connection
- Higher TRL
- Construction of an Advisory Board
