Call for Workshop Proposals

The MODELS series of conferences is the premier venue for the exchange of innovative technical ideas and experiences relating to model-driven approaches in the development of software-based systems. Domain-specific modeling languages, model-driven engineering, model transformations, aspect-oriented modeling, verification and validation and real-time are among the topics covered by the conference.

Following the tradition of previous conferences, MODELS 2008 will host a number of workshops, during the 3 days before then main conference. The workshops will provide a collaborative forum for a group of (typically 15 to 30) participants to exchange recent and/or preliminary results, to conduct intensive discussions on a particular topic, or to coordinate efforts between representatives of a technical community. They are intended as a forum for lively discussion of innovative ideas, recent progress, or practical experience on model-driven engineering for specific aspects, specific problems, or domain-specific needs.

Each workshop should provide a balanced distribution of its time for both, presentation of papers (favoring the attendance of young researchers) and discussions. We encourage prospective workshop organizers to submit proposals for highly-interactive workshops focusing on areas related to modeling in general. Both research-oriented and applied topics are welcome. The duration of these workshops is one day.

Workshop Committee
Michel Chaudron, Technische Universiteit Eindhoven & Leiden University, NL, (chair)
Holger Giese, University of Paderborn, DE
Henry Muccini, University of L'Aquila, IT
Jochen Küster, IBM Research Zurich, CH
Hans Vangheluwe, McGill University, CANADA

Important Dates
Deadline for submissions: March 2, 2008
Notification of acceptance: March 30, 2008

Submissions
Submit your workshop proposal electronically in PDF using the Springer LNCS style to m.r.v.chaudron@tue.nl. Please ensure that you adhere to the workshop proposal guidelines (to be found on the MODELS website) providing all requested information about the proposed workshop using at most 5 pages. Please add in addition a one page draft of your planned “Call for Papers” to the proposal (not included in the 5 pages).

If you are thinking of submitting a workshop proposal, we strongly encourage you to submit the title and abstract of the workshop as early as possible, indicating the planned
topic for your workshop. This will help us to plan a strong workshop program for MODELS, and will allow us to put you in touch with anyone else developing a proposal for the same or similar topic.

In order to ensure a proper coordination with the deadlines of the main conference, the following constraints have to be respected by the deadlines you plan for your workshop:

<table>
<thead>
<tr>
<th>Event</th>
<th>Deadline</th>
